

ARTESIAN COLLABORATIVE. LLC

||| Emerging Therapist Position Available

The vision of Artesian Collaborative, LLC is to change the world by changing how we relate to ourselves, our workplaces and our communities. We aim to do this by empowering our clients to harness pain and direct it towards growth that reshape lives, relationships and communities. We are currently seeking candidates for our Emerging Therapist position to provide excellent therapy services, develop a rewarding career with our proven methodologies and bring relevant value to our team.

Therapists at Artesian Collaborative recognize the great privilege of being able to walk alongside their clients and enable them to grow. To do this, our therapists commit themselves to providing high-quality and ethical emotional and behavioral health services. Our treatment philosophy is geared towards validating and recognizing the pain and obstacles in our client's lives and working with them to point them towards hope, growth and change. This includes being open and aware of how each client's story, identity and background inform their experience and the ways that their relationship and communities impact them.

Our therapists also recognize that to do this work in a healthy and sustainable way requires openness, honesty and a commitment to personal and communal growth. All of our clinical staff take the time to self-reflect, hone their skills both on their own and in community with other providers. Artesian Collaborative therapists participate in supervision and team meetings and share the responsibility of bringing insight, knowledge, questions and perspective into discussions and supervision. We see participation as encouragement, support, accountability, bringing knowledge from research and practice along with sharing our diverse and unique perspectives and valuing the perspectives of others.

One of our core pursuits is to find creative ways to bring the resources and skills of therapy outside the walls of the clinic and are looking for team members that are interested in being innovative, thoughtful and collaborative in our pursuit to expand the ways we can serve our city.

Emerging therapists will have the opportunity to develop their clinical practice through learning empirically validated and culturally competent clinical tools; integrate nonclinical responsibilities into the model and philosophy of care; foster their professional development through supervision, assessment and program development and collaboratively engaging with others to bring their full selves to the workplace and community.
